

January 25, 2011

The FDA has notified [CDG Environmental, LLC](#) of its approval of Food Contact Notification FCN 001052 for [CDG Solution 3000™](#), effective March 23, 2011.

The FCN permits the use of [CDG Solution 3000™](#), to be used as an antimicrobial agent when applied to red meat (including meat parts and organs), processed, comminuted, or formed meat products, raw agricultural commodities, and seafood.

[CDG Environmental, LLC](#) produces and sells proprietary, highly engineered [chlorine dioxide](#) chemistries used for water treatment, food, beverage and numerous municipal and industrial applications.

The Company provides [CDG Solution 3000™](#), storage-stable chlorine dioxide aqueous solution, for distributed applications. [CDG Solution 3000™](#) is the only product on the market capable of delivering the [chlorine dioxide](#) molecule to the end user's application in a concentrated, ready-to-use form without the need for any on-site generation or "activation".
